Fix my SEO Issues

Issues to fix

HIGH

To provide a good user experience, Google recommends that sites should aim for a Cumulative Layout Shift score of 0.1 or less.

Details

HIGH

To improve the website experience for your visitors, it is recommended to eliminate any render-blocking resources on this webpage.

Details

MEDIUM

Serving resources (images, JS, CSS) from a CDN service, could improve website loading times, reduce bandwidth costs and increase content availability and redundancy.

Warnings: 0

Passed: 5

Domain Business Context

Understanding the business context of a domain can help you create content that is more relevant to your target audience and differentiate your website from competitors.

WHAT IS THIS DOMAIN ABOUT

An Indian IPO research and analytics platform for tracking GMP, subscription trends, allotment dates, and issue timelines.

INDUSTRY NICHE

IPO Research & Analytics

TARGET AUDIENCE

Retail investors, IPO applicants, and market watchers seeking live issue data and decision tools.

Content Strengths and Weaknesses

This webpage is well-structured and highly focused on IPO tracking, with clear tools, live updates, and educational support content. Its main weaknesses are limited depth on broker data and relatively light evidence of original analysis beyond aggregated market indicators.

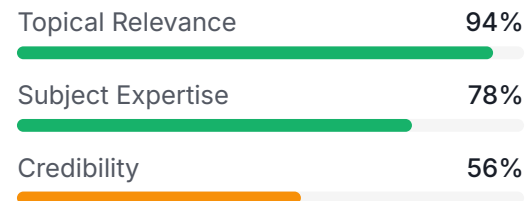

CONTENT STRENGTHS

- ✓ Clear topical focus
- ✓ Strong utility tools
- ✓ Fresh live data cues

CONTENT WEAKNESSES

- ⚠ Limited broker coverage
- ⚠ Shallow methodology detail
- ⚠ Sparse original analysis

Content Trust Score

This webpage appears moderately trustworthy because it is tightly focused on IPO research and includes clear policy, disclaimer, and methodology links. Trust is strengthened by live update indicators and official-filing references, but weakened by the lack of visible author attribution and limited third-party validation on the page.

Content Freshness

The page looks very fresh, with explicit live update timing, current open and upcoming IPO listings, and near-term offer dates. The content is clearly maintained as an active market tracker rather than a static informational page.

POSITIVE SIGNALS

- ✓ Live update timestamp
- ✓ Rolling refresh cadence
- ✓ Current 2026 IPO dates

Content Opportunities

The website already covers core IPO tracking needs well, but it could deepen its authority with more explanatory, evidence-backed, and user-specific content. The biggest opportunities are to expand methodology transparency, add richer decision support, and create more differentiated educational resources around IPO outcomes and risk.

QUICK WINS

- Add a short homepage block summarizing how the hype score is calculated.
- Link the methodology page directly beside each live metric label.
- Publish one comparison article for mainboard vs SME IPOs with examples.

Most Common Keywords Test

There is likely no optimal keyword density (search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy.

Custom 404 Error Page Test

This website is using a custom 404 error page.

80% of top 100 sites passed

We recommend to have a custom 404 error page in order to improve the website's user experience by letting users know that only a specific page is missing/broken (and not the entire site), providing them helpful links, the opportunity to report bugs, and potentially [track the source of broken links](#).

Noindex Tag Test

This webpage does not use the noindex meta tag. This means that it can be indexed by search

99% of top 100 sites passed

gines.

Canonical Tag Test

93% of top 100 sites passed

This webpage is using the canonical link tag. This tag specifies that the URL: [ps://www.ipocraft.com/](https://www.ipocraft.com/) is preferred to be used in search results. Please ensure that this specification is correct, as canonical tags are often hard-coded and may not always reflect the latest changes in a site's URL structure.

```
<link href="https://www.ipocraft.com" rel="canonical"/>
```

Nofollow Tag Test

This webpage does not use the nofollow meta tag. This means that search engines will crawl all links from this webpage.

Disallow Directive Test

Your robots.txt file includes a disallow command which instructs search engines to avoid certain parts of your website! You are advised to confirm if access to these resources or pages are intended to be blocked (e.g., if they contain internal-only content or sensitive information).

► [See results list](#)

Meta Refresh Test

This webpage is not using a meta refresh tag.

98% of top 100 sites passed

SPF Records Test

This DNS server is using an SPF record.

94% of top 100 sites passed

```
v=spf1 include:_spf.mail.hostinger.
com include:_spf.reach.hostinger.co
m ~all
```

Ads.txt Validation Test

This website is using an **Authorized Digital Sellers (ads.txt) file** and its content has a valid

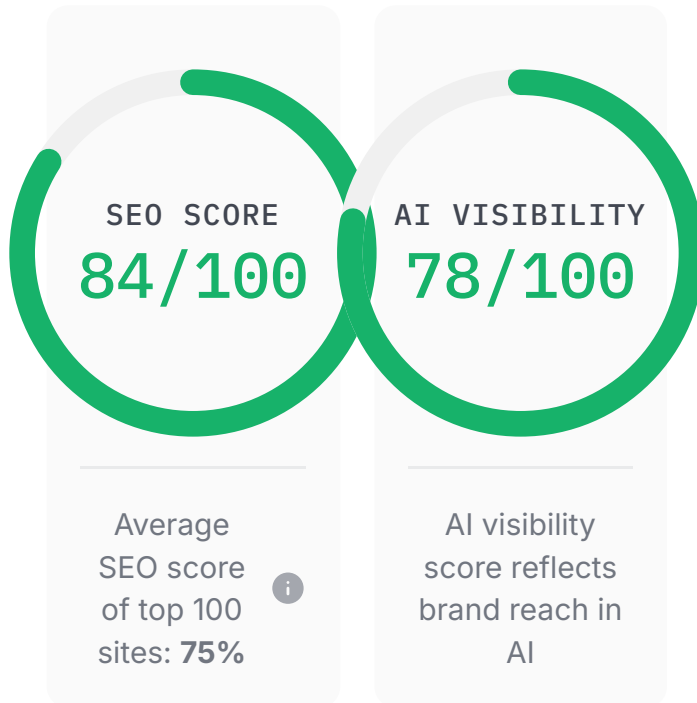

67% of top 100 sites passed

format. Since the file is uploaded and maintained by publishers on their own domain, it's not easy for bad players to gain access to it or to change entries. Buyers who want to bid on the publisher's inventory can refer to their ads.txt file and confidently know that the exchange they are dealing with is in fact authorized to directly or indirectly sell the publisher's inventory.
